

Draining racks

Made entirely of shockproof PS: it does not rust and flake over time.

Consisting of a support plate with a thickness of 4 mm and printed in one piece, dimensions 450 x 630 x 110 mm.

Equipped with 72 blind-bottom holes for pressure insertion of the relative pins, designed to avoid any loss and eliminate the danger of biological contamination.

Comes complete with 72 standard size pegs for 15mm top opening objects and 11 small pegs for small diameter objects such as test tubes and similar products.

The pegs, if necessary, can be easily removed in order to insert objects with particular shapes.

The particular drainage channel, without junction lines, conveys the draining liquid into the appropriate drainage pipe.
Internal diameter exhaust pipe: 11 - external diameter: 13

Several glazing racks can be mounted next to each other, to obtain a wall equipped for this purpose.

Equipped with instructions, hooks for assembly and drainage system (fitting + drain hose).

External dimensions of the product

Height	63 mm
Width	45 mm
Depth	11 mm
